List of Journals

The periodical and serial publications listed below are regularly received and scanned by INSPEC for its information services. The selection of articles from any particular journal and their inclusion in any of the INSPEC abstracts journals (Physics Abstracts, Electrical & Electronics abstracts and Computer & Control Abstracts) depends on the subject and quality of those articles. However a list of those journals from which all articles are normally abstracted is given at the end of this list.

JOURNALS ABSTRACTED COMPLETELY

Selection of articles from any journal included in the **List of Journals** depends on the subject of the articles and their quality.

A number of these journals however are central to the INSPEC subject field and of a quality such that, virtually without exception, all articles are regularly abstracted. These journals are listed below.

ACM Trans. Database Syst. (USA)
ACM Trans. Math. Software (USA)
ACM Trans. Program. Lang. & Syst. (USA)

The use of l’, n’ and t’ in Russian and Bulgarian (where they are not transliterations of a single letter, but merely l, n or t followed by the soft sign) is included to emphasise the fact that they are used for single letters only in Serbian.

‘Shch’ and ‘sht’ invariably represent the letter III, in Russian and Bulgarian, respectively, since the pairs of letters (IIIh in Russian and IIIT in Bulgarian) seem never to occur consecutively in the respective languages.

The above table is reproduced, by permission, from the pamphlet ‘The transliteration of Russian, Serbian and Bulgarian for bibliographical purposes’ published by the Royal Society, Burlington House, London W1 (February 1953, price 5p.). It represents the system at present in use in Science Abstracts for the transliteration of the names of journals and the names of authors of articles abstracted.

VISION AND SOUND

A special issue of the IEE Proceedings, Part A

Editors: Dr. B. Townsend and P. J. Darby MBE

Available now for only £12.00 ($27.00)

Since 1978, when the IEE published a special issue of *Electronics Record* on 'Pal colour television', the broadcasting world has altered dramatically.

This special issue covers developments in the whole field of broadcasting and programme distribution, and in the related aspects of home entertainment and information technology, together with reviews of the future trends within these different areas.

The scene is changing rapidly, but it is possible to look with pride on existing achievements as we contemplate the exciting developments which are likely to affect us in the near future.

IN-DEPTH COVERAGE OF

- **Digital television coding standards**
- **Digital techniques in the future television studio**
- **Digital television networks**
- **Development of video cameras and recorders for lightweight television production**
- **Digital techniques in film scanning**
- **The Television Consistency Index: Formulation and preliminary tests**
- **Cable television**
- **Transportable satellite up-links: Towards SNG?**
- **Television receiver design: Recent trends and applications**
- **Direct broadcasting from satellites**
- **Extended-definition television service**
- **Unattended television and radio transmitters**
- **Radio and television studio testing**
- **Enhanced UK teletext: Level 4 alphageometrics**
- **Wind- and sun-powered transmitters**
- **Citizens-band radio**
- **Multiple sound channels in satellite broadcasting**

SPECIFICATION AND TASKING IN

ADA

A special issue of the IEE Proceedings, Part E

Edited by Dr F. K. Hanna

Available now for only £12.00 ($27.00)

Augusta Ada, Countess of Lovelace

Reproduced by kind permission of the Controller of HMSO

The development of the programming language Ada represents one of the largest software engineering projects ever undertaken.

It may also turn out to be one of the most significant.

It is indisputably one of the most controversial.

Ada is intended for use by the professional software engineer involved in writing specifications and programs for embedded computer systems.

Ada is still at an early stage in its life; the first compilers are just becoming available and the first test programs are just being run.

This exciting special issue features:

- **Axioms and proof rules for Ada tasks.** *H. Barringer and I. Mearns*
- **Ada package specifications: path expressions and monitors.** *Prof. S.J. Goldsack and T. Moreton*
- **Program verification and Ada.** *A.D. McGettrick*
- **Structure and tasking features of the programming language Martlet.** *Prof. R.L. Grimsdale, F. Halsall, F. Martin-Polo and S. Wong*
- **Specifying and implementing object manager in Ada.** *W.T. Harwood*
- **Ada model arithmetic: costs and benefits.** *P.J.L. Wallis*

Bibliographical details:

Ada, special issues of IEE Proceedings Part E, Vol. 129, No. 2, 1982
55 pp., 297 x 210 soft covers

ELECTRICAL & ELECTRONICS ABSTRACTS

The Complete Information Service for the Electrical and Electronics Engineer

Coverage

Over 50,000 references are included each year. These are selected by scanning about 2,800 journals and the proceedings of over 500 conferences.
In addition coverage is given of books, reports and dissertations.

What Information is Included?

Each reference in Electrical & Electronics Abstracts includes the following information:

Title of paper

All author's names and affiliation of first author

Source of paper (eg name of journal, volume and issue number, page numbers and date of publication)

100 -150 word abstract of the reference.

Ease of use

Careful classifying and indexing of entries puts information at your fingertips. References are classified under 250 headings, allowing you to go straight to the information of most interest to you. (A summary of the classification appears in every issue).

These six separate indexes are included in each issue:

Subject guide
Author index
Bibliography index
Book index
Conference index
Corporate author index

The above indexes are cumulated at six-monthly intervals. The author and subject indexes are also cumulated at four-yearly intervals*.

Do You Have Access to This Important Journal?

Does your library or information service provide you with access to this important journal? If not, ask your librarian to contact INSPEC for a free sample and subscription details or write to us direct.

CUMULATIVE INDEXES

Cumulative indexes are available for *Physics Abstracts*, *Electrical & Electronics Abstracts* and *Computer & Control Abstracts*, for both authors and subjects. These cumulations generally cover a period of four years, with the exception of *Computer & Control Abstracts* where the initial volume covered the period 1966–68. The table below shows the prices and periods for the two types of cumulative index.

	PHYSICS ABSTRACTS		ELECTRICAL & ELECTRONICS ABSTRACTS		COMPUTER & CONTROL ABSTRACTS	
	Subject	Author	Subject	Author	Subject	Author
	£	£	£	£	£	£
1955–59	20	20	15	20	—	—
1960–64	40	17	20	12	—	—
1965–68	60	25	35	20	—	—

OTHER INSPEC SERVICES

SDI

(Selective Dissemination of Information.) This is a service individually tailored to the requirements and interests of the engineer or research worker. Details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC database. Information is dispatched weekly on 150 mm × 100 mm (6″ × 4″) cards.

TOPICS

This is an SDI service based on standard profiles. There are over 70 subjects covering high-activity areas of research and development. This is an inexpensive card service designed to alert engineers and researchers to the availability of literature within their subject area.

MAGNETIC TAPES

Tapes containing all the information included in the INSPEC publications are issued twice monthly. They enable the larger research and development organisations to produce their own internal information and current-awareness services.

1977-80 CUMULATIVE INDEXES

Search 4 years at a time using the latest Cumulative Indexes.

- **Save Time**

  Your search is completed faster with the 1977-80 Cumulative Indexes

- **Increase Precision**

  The subject indexing has been revised to relate all the entries produced over the four year period to the 1980 subject headings.
